Unleashing Extreme Scalability with Azure Functions

AZURE DAY

# Azure Functions

## Code

## Events + data

AZURE DAY

# Azure Functions Features

- Event-driven Triggers and Bindings
- Choice of Language
- Development Tools Integration
- Hosting Options
- Built-In Security and Compliance
- Flexible Pricing
- Scalability
- Serverless Workflow
- Open source

Unleashing Extreme Scalability with Azure Functions

AZURE DAY

# Biggest Serverless Issue: Cold Starts

AZURE DAY

# Cold Start Solutions

**Premium Functions**

Always Ready

**Consumption Functions**

You wait

**Flex Consumption**

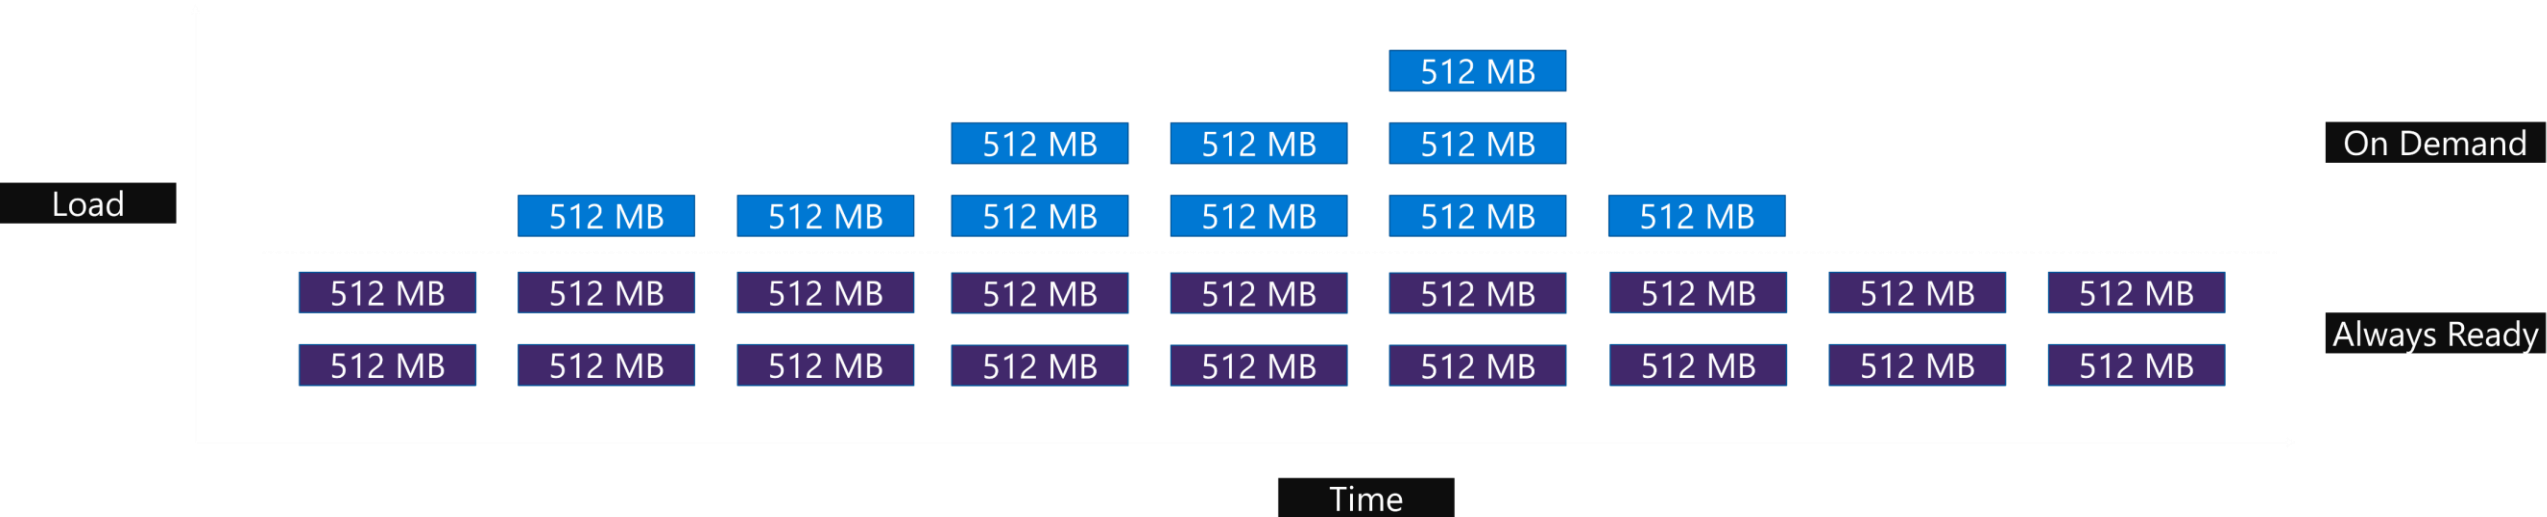

(Optional) Always Ready

AZURE DAY

# Always Ready Instances

- Choose instances that are always running
- Set minimum number of instances always ready

AZURE DAY

# Virtual Network Support

AZURE DAY

# Virtual Network Support

AZURE DAY

# Virtual Network Support

- Inbound Private Endpoints
- Virtual Network Integration
- Virtual Network Triggers (non-HTTP)
- Hybrid connections (Windows only)

AZURE DAY

# Instance Memory Choice

- 2048-Mb and 4096-Mb (more options coming)
- Default is 2048-Mb
- Change instance memory size at any time
- More memory means more can be done

AZURE DAY

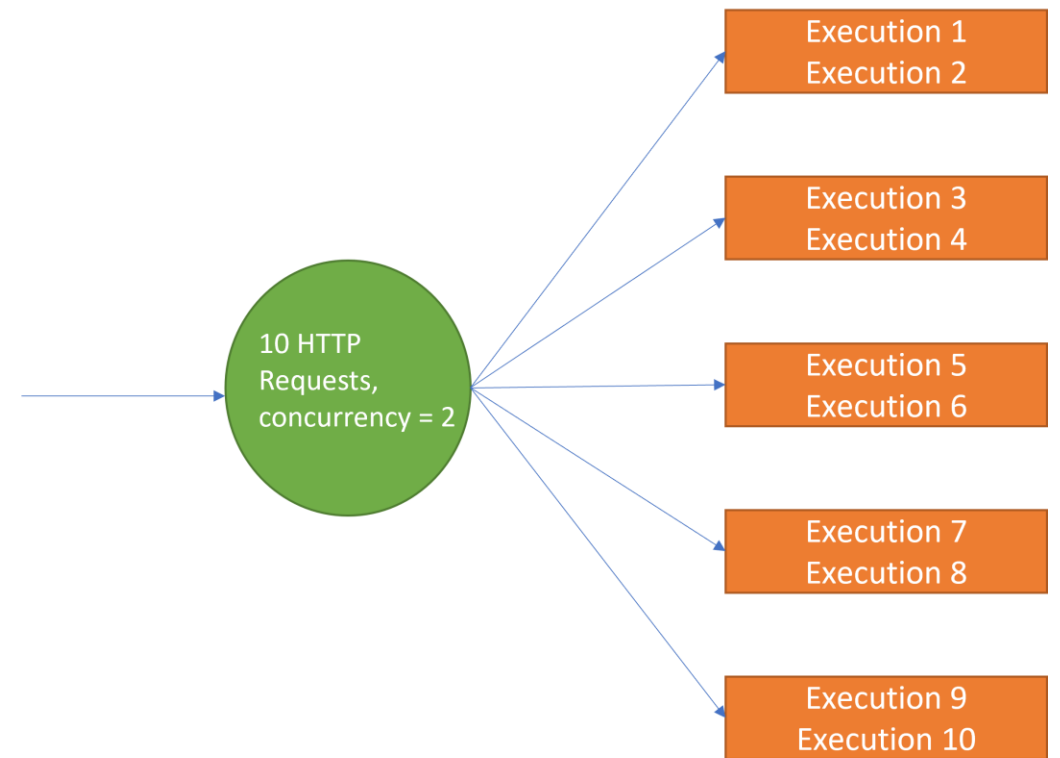

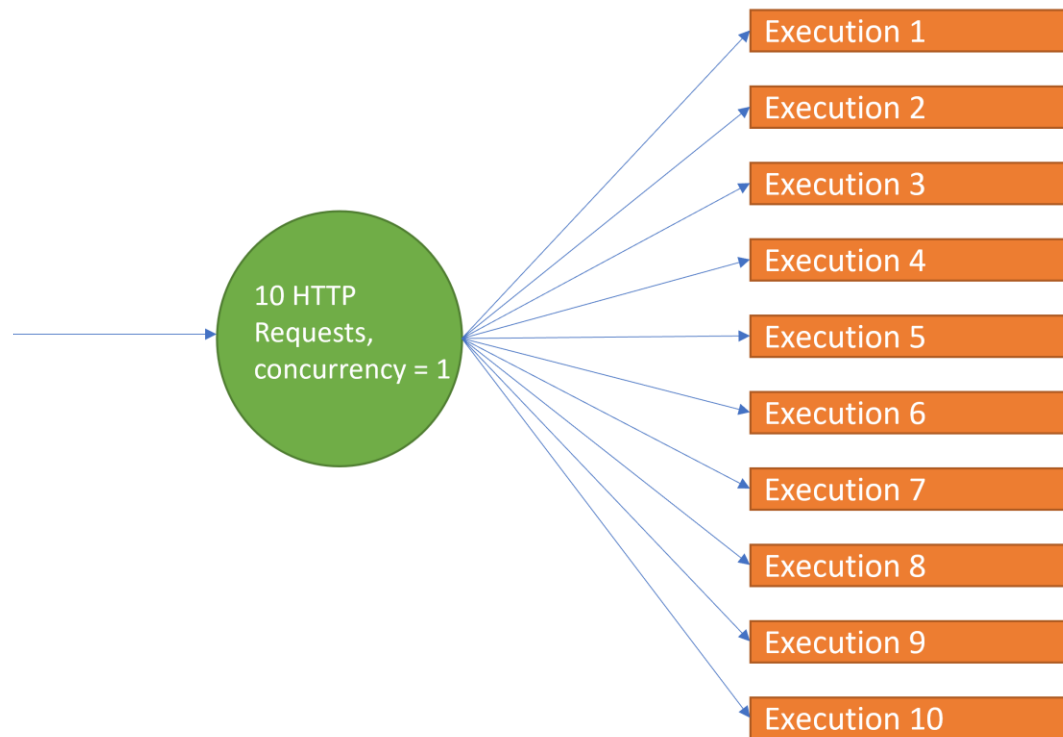

# Per-Instance Concurrency

- Number of parallel executions
- Can set concurrency level per instance
- Has a direct effect on how your app scales

AZURE DAY

# Per-Instance Concurrency

AZURE DAY

# Per-Instance Concurrency Defaults

- Python – 1
- Other languages
  - 512-Mb: 4
  - 2048-Mb: 16
  - 4096-Mb: 32

AZURE DAY

# Per-Function Scaling

- Deterministic way of scaling your app on a per-function basis
- No code changes
- Special cases: HTTP, Blob (Event Grid), and Durable trigger

AZURE DAY

# Per-Function Scaling

- Deterministic way of scaling your app on a per-function basis
- No code changes
- Special cases: HTTP, Blob (Event Grid), and Durable trigger

Function 1

Function 2

Function 3

Function 4

Function 6

Function 7

Function 8

AZURE DAY

# Scale-Out Further

- Default is 100 instances
- Highest is 1000 instances
- Lowest is 40 instances

## **Region Subscription Memory Quota**

512,000 MB per region per subscription

AZURE DAY

# Extreme Scalability

AZURE DAY

# Demo

AZURE DAY

# Even More Benefits

- Azure Load Testing Integration
- Open Telemetry Opt-In
- Long Execution Times

AZURE DAY

# Flex Consumption Features and Benefits

- Always Ready
- Virtual Network Support
- Instance Memory Choice
- Per-Instance Concurrency
- Per-Function Scaling
- Scale-Out Further
- Extreme Scalability
- Azure Load Testing Integration
- Open Telemetry Opt-In
- Long Execution Times

# Pricing

AZURE DAY

# Pricing

**On-Demand**

**Always Ready**

Meter	Free Grant (per month)	Pay as you go
On Demand Execution Time	100,000 GB-s	\$0.000019/GB-s
On Demand Total Executions	250,000 executions	\$0.20 per million executions
Always Ready Baseline		\$0.000004/GB-s
Always Ready Execution Time		\$0.000011/GB-s
Always Ready Total Executions		\$0.20 per million executions

North Europe Region

AZURE DAY

# Pricing

## Azure Function Scenario

3 million executions per month; each execution using 512 MB and running for 1 second

Consumption: \$18.00

Premium: \$152.31

Flex Consumption (w/o Always Ready): \$24.35

North Europe Region

AZURE DAY

# Pricing

## **Flex Consumption with Always Ready Scenario**

3 million executions per month; each execution using 512 MB and running for 1 second; 1% of executions performed while idle

Consumption: \$18.00

Premium: \$152.31

Flex Consumption (w/o Always Ready): \$24.35

Flex Consumption (with Always Ready): \$40.03

North Europe Region

AZURE DAY

# Pricing

## Actual Scenario

434k executions per month; each execution using 2048 MB and running for 400 milliseconds; VNet connectivity needed no  
Always Ready (cold starts acceptable)

Consumption: N/A

Premium: \$155.27

Flex Consumption: \$4.16

East US 2 Region

AZURE DAY

# Considerazioni

Unleashing Extreme Scalability with Azure Functions

AZURE DAY

# Considerations

- Not all triggers fully supported (yet)

## Unsupported Triggers

Kafka

Azure SQL

SignalR

## Not-Fully Supported

Blob (only supports the Event Grid source)

AZURE DAY

# Considerations

- Not all triggers fully supported (yet)
- Not all regions are supported (yet)

## **Flex Consumption Regions**

- East US
- North Europe
- Southeast Asia
- East Asia
- East US 2
- South Central US
- Australia East
- North Central US
- West US 2
- UK South
- West US 3
- Sweden Central

AZURE DAY

# Considerations

- Not all triggers fully supported (yet)
- Not all regions are supported (yet)
- Deployment options limited (currently)

## **Unsupported Deployment Methods**

- Azure DevOps Task (AzureFunctionApp@2)
- GitHub Actions (function-action@v1)
- Deployment Slots

AZURE DAY

# Considerations

- Not all triggers fully supported (yet)
- Not all regions are supported (yet)
- Deployment options limited (currently)
- Scaling limitations (currently)

## Scaling Limitations

- Lowest maximum scale is 40
- Highest maximum scale is 1000

AZURE DAY

# Considerations

- Not all triggers fully supported (yet)
- Not all regions are supported (yet)
- Deployment options limited (currently)
- Scaling limitations (currently)
- Limited Support – Preview Functionality

AZURE DAY

# Demo

AZURE DAY

# Create a Flex Consumption Function App

```
az functionapp list-flexconsumption-locations --output table
```

```
az group create --name rg-DemoPrep-demo-use2 --location eastus2
```

```
az storage account create --name stdemoprepdemouse2 --location  
eastus2 --resource-group rg-DemoPrep-demo-use2 --sku Standard_LRS --  
allow-blob-public-access false
```

```
az functionapp create --resource-group rg-DemoPrep-demo-use2 --name  
func-DemoPrep-demo-use2 --storage-account stdemoprepdemouse2 --  
flexconsumption-location eastus2 --runtime dotnet-isolated --runtime-  
version 8.0
```

AZURE DAY

# Deploy the Function App to Azure

```
func azure functionapp publish func-DemoPrep-demo-use2
```

AZURE DAY

# Enable Virtual Network Integration

```
az network vnet create --name vnet-DemoPrep-demo-use2 --  
resource-group rg-DemoPrep-demo-use2 --address-prefix  
10.0.0.0/16 --subnet-name snet-DemoPrep-demo-use2 --subnet-  
prefixes 10.0.0.0/24
```

```
az functionapp vnet-integration add --resource-group rg-DemoPrep-  
demo-use2 --name func-DemoPrep-demo-use2 --vnet vnet-  
DemoPrep-demo-use2 --subnet snet-DemoPrep-demo-use2
```

AZURE DAY

# Configure Instance Memory

```
az functionapp scale config set --resource-group rg-DemoPrep-  
demo-use2 --name func-DemoPrep-demo-use2 --instance-memory  
4096
```

AZURE DAY

# Set the Always Ready Instance Count

```
az functionapp scale config always-ready set --resource-group rg-  
DemoPrep-demo-use2 --name func-DemoPrep-demo-use2 --settings  
http=10
```

AZURE DAY

# Set HTTP Concurrency Limits

```
az functionapp scale config set --resource-group rg-DemoPrep-  
demo-use2 --name func-DemoPrep-demo-use2 --trigger-type http --  
trigger-settings perInstanceConcurrency=10
```

# Decisioni

Unleashing Extreme Scalability with Azure Functions

AZURE DAY

# Hosting Decisions

Consumption

Flex Consumption

Premium

Dedicated

Container Apps

AZURE DAY

# Hosting Decisions

**Consumption**

Flex Consumption

Premium

Dedicated

Container Apps

## **Benefits**

- Pay only when your functions are running (pay-as-you-go)
- True serverless hosting
- Automatic scaling during high load

## **Use case**

Ideal for sporadic workloads with varying demand

AZURE DAY

# Hosting Decisions

Consumption

**Flex Consumption**

Premium

Dedicated

Container Apps

## Benefits

- High scalability with compute choices
- Support virtual networking for added security
- Specify pre-provisioned instances to reduce cold starts
- Connects to virtual networks

## Use case

- When you need more control over concurrency and what to pay-as-you-go
- When you need VNet support for sporadic workloads

AZURE DAY

# Hosting Decisions

Consumption

Flex Consumption

**Premium**

Dedicated

Container Apps

## **Benefits**

- Automatically scales based on demand using prewarmed workers
- Suitable for continuous or nearly continuous workloads
- Connects to virtual networks

## **Use case**

- Multiple functions apps on the same plan with event-driven scaling
- Need for more compute power
- When you need VNet support for high-use workloads

AZURE DAY

# Hosting Decisions

Consumption

Flex Consumption

Premium

**Dedicated**

Container Apps

## Benefits

- Dedicated compute resources for your app
- Ideal for complex applications with customization needs
- Fully utilize existing App Service Plans

## Use case

- Get full utilization of an existing App Service Plan
- Long-running scenarios where Durable Functions cannot be used

# Hosting Decisions

Consumption

Flex Consumption

Premium

Dedicated

**Container Apps**

## Benefits

- Run your function app in a container
- Fully managed environment
- Dapr Support

## Use case

- Mixing with other Container Apps and/or need Dapr support
- Migrating code execution from on-premises or legacy apps

AZURE DAY
